PERSONAL PROJECTS

BOOKWORMDENN (ECOMMERCE WEBSITE) (12/2024 - 01/2025)

- Built and deployed a complete **full-stack e-commerce platform** with secure **payment integration** and a dedicated **admin panel** .
- Developed **RESTful APIs** , implemented **JWT authentication** , and enforced **role-based access control** .
- Designed a fully responsive UI using **TailwindCSS** , focusing on clean layouts and consistent user experience.
- Ensured scalability with a **modular architecture** and well-structured backend logic.
- Configured **MongoDB locally** due to MongoDB Atlas IP restrictions, with the project fully prepared for **cloud migration** .

CHAT-APP (REAL TIME MESSAGING) (01/2025 - 02/2025)

- Built a real-time **chat application** using **Socket.io** for instant message delivery, typing indicators, and live notifications.
- Implemented a secure **JWT-based login system** with protected routes and session handling.
- Managed global state efficiently in **React** , ensuring smooth message flow and minimal UI lag.
- Designed a polished and responsive interface using **DaisyUI** , improving overall **user experience** and message-handling performance.

COURSE

TryCatch Tech (03/2024 - 02/2025)

Completed a comprehensive **MERN Stack Diploma** focused on building modern, scalable full-stack applications using **MongoDB** , **Express.js** , **React** , and **Node.js** . Gained hands-on experience in API development, authentication, state management, and deployment workflows. Built two real-world projects: **BookWormDenn** , a full-stack book management platform, and a real-time **Chat Application** showcasing socket-based communication and responsive UI design.
